LOFTwall™

one wall. many ways.

**Defining your workspace
has never been more flexible,
stylish or creative.**

With LOFTwall™ modular divider partitions, the possibilities are endless. By combining a sleek aluminum frame design with removable, customizable panels, LOFTwall™ helps you redefine and enhance workspaces to suit your company's needs.

WORKSPACE

When your workspace needs to change, LOFTwall™ can easily change and reconfigure with you. The portable nature of LOFTwall™ makes it a much more flexible solution than traditional divider or cubicle wall systems.

LOFTwall's design is completely scalable. As your workspace needs to grow, simply add to your existing pieces to create larger configurations. Add any of our standard finishes, custom fabrics, whiteboard or tack board infills to accommodate workplace needs.

Created for non-traditional work environments, whether it's a home office or a large company, LOFTwall™ allows you to divide space, add function, create privacy and brand a space.

DESIGN IDEAS:

- ▶ Use a LOFTwall™ partition--easily branded with your company logo--in an entry or reception area.
- ▶ LOFTwall™ can define a meeting space, work areas or hide unsightly clutter.
- ▶ Section off a corner to create a break area for reading, relaxation or other uses.
- ▶ Create a project or inspiration wall to display images, drawings or ideas related to a project.

divider screens for living and working.

FRAMES

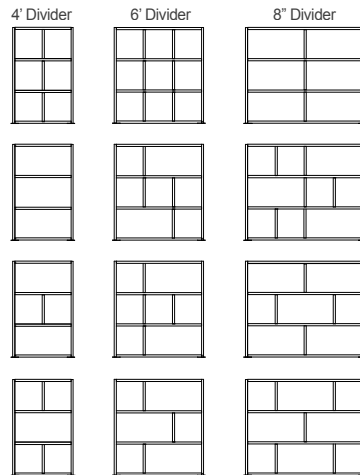

Aluminum frame designs are available in 78" height with 4', 6' and 8' widths. Frame hardware includes all components, bases and tools for assembly. Custom frame colors and finishes are available.

INFILLS

LOFTwall™ infills are available in a wide range of finishes to create your own unique combination or look. Our DIY panels are ready for you to add fabric, wallpaper or to experiment with your own distinct ideas.

Sustainability Vision:

LOFTwall™ is an environmentally conscious company that contributes to a green and sustainable environment. We have evaluated our waste sources and created procedures for elimination or minimization through recycling, engineering, process modification and reduction.
